

充气柜套管

Inflatable bushing

用在充气型环网柜箱变中，可有效密封柜内绝缘介质，全绝缘，免维护。®

Type: AP-TG/3
(充气柜套管 Inflatable bushing)

1. Suitable for inflatable type ring main unit.
2. Can effectively seal dielectric in the cabinet.
3. Fully insulated, free maintenance.

圆连接套管

Round connecting bushing

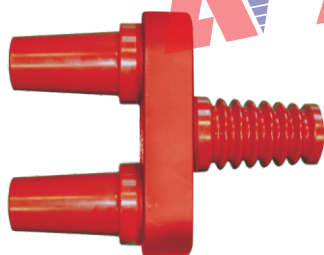

圆连接套管固定在欧式分支箱上，两端可安装前接头，并可扩展分支。起母线作用，实现多分支供电。在不带电或不分支的使用情况下，可用630A绝缘帽将其密封，提供防尘、防潮和绝缘保护。®

Type: AP-TG/4
(圆连接套管 Round connecting bushing)

圆连接套管全绝缘、全密封，广泛用于欧式分支箱。

1. Fixed on the Europe-style cable branch box.
2. Both its two ends can be mounted with front connector to offer more branch systems.
3. In the condition of non-energized or non-branch system, it can be sealed by 630A insulation cap which used to provide dustproof, moisture proof and insulating protection.
4. Widely used in Europe-style cable branch box.
5. Fully-insulated and fully-sealed.

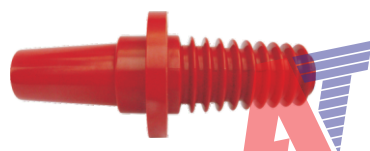

Type: AP-TG/7
(三通套管 Tee bushing)

三通套管 / 带伞套管

Tee bushing / skirted bushing

套管一侧可安装前接头®，并可扩展分支。带伞侧搭接母排，空气绝缘。

Type: AP-TG/5
(带伞套管 Skirted bushing)

1. One end of bushing can be mated with front connector to offer more branch systems.
2. Another end with skirt connected with bus-bar is air isolation.
