24kV | 肘型/直插连接器 Elbow / straight connector

Type: AZT-24/250/□
(肘型连接器 Elbow connector)

肘型连接器、直插连接器用于环网柜变压器出线单元，额定电流 250A，用于 12/20kV、18/30kV 交联电缆，适用电缆截面 35~120mm²。有特制防松脱结构，实现了弹性压紧。

1. Elbow connector and straight connector are suitable for the out terminator of ring main unit and transformer.
2. Rated current is 250A.
3. Apply to 12/20kV、18/30kV XLPE cable, and conductive cross section is 35~120mm².
4. Special fixing structure makes sure the tight compress of installation.

Type: AZC-24/250/□
(直插连接器 Straight connector)

产品特点

为全绝缘、全密封、全屏蔽产品。防松脱压紧装置保证了其使用的可靠性，相对于其它配置，结构尺寸更紧凑。

Characteristics

1. Fully-insulated, fully-submersible and fully screened.
2. The compress device guarantees the reliable using.
3. Structure dimension is more compact.

- 1、电缆 Cable
- 2、接地线 Earthing wire
- 3、半导体层
Semi-conductive tape
- 4、异形螺栓 Bolt
- 5、端子 Compression lug
- 6、螺母 Nut
- 7、肘型/直插连接器
Elbow/straight connector body
- 8、压板 Compression board
- 9、导电杆 Linking rod
